Our Vision for Ekurhuleni

Ekurhuleni should be one of Africa's leading industrial and manufacturing cities: a municipality where businesses can invest, factories can grow, residents can find employment, streets are clean and safe, and households receive reliable electricity, water, sanitation and refuse services.

The AHC Constitution places community consultation, Ubuntu, integrated economic development, social justice, accountable leadership, environmental responsibility and community participation at the Centre of the organization.

The AHC 2026 Local Government Elections Manifesto further identifies Ekurhuleni's problems with potholes, sewer spillages and illegal dumping and commits AHC to capable government, resolving C Forms, housing cases, affordable services, local procurement, employment opportunities, community safety and action against gender-based violence.

Ekurhuleni built SA's economy but suffers potholes, sewer spillages, illegal dumping in Katlehong, Tembisa, Vosloorus and other areas.
