

ALL NATIVES OF SOUTH AFRICA – ANOSA

2026 Local Government Election Manifesto

ANOSA is committed to restoring dignity, accountability, safety, and opportunity within South African communities. Our manifesto is centred on empowering local citizens, improving service delivery, strengthening infrastructure, and ensuring that every community has access to sustainable economic opportunities and a safer future.

1. Economic Growth and Local Empowerment

- Prioritise local economic development by supporting small businesses, entrepreneurs, and informal traders within local communities.
- Promote community-based job creation by prioritising employment opportunities for qualified residents within their own wards and municipalities.
- Encourage skills development initiatives, vocational training, and youth empowerment programmes to reduce unemployment and stimulate economic participation.
- Partner with local industries and investors to create sustainable economic opportunities that directly benefit South African communities.

2. Immigration and Community Safety

- Ensure that individuals residing or operating businesses illegally within South Africa are processed in accordance with the law and relevant immigration regulations.
- Strengthen cooperation between local law enforcement agencies and immigration authorities to combat illegal activities and improve community safety.
- Ensure that non-citizens involved in criminal activity face the full consequences of the law, followed by the appropriate legal deportation procedures where applicable.
- Promote lawful migration systems that protect the rights, security, and economic opportunities of South African citizens.

3. Service Delivery and Basic Needs

- Implement a comprehensive and transparent water management strategy that includes infrastructure maintenance, pollution control, and regular water quality monitoring.
- Establish emergency borehole systems and alternative water supply measures within every voting district to minimise the impact of water disruptions.
- Expand access to safe, clean, and sanitary public toilet facilities in underserved communities.

- Accelerate electrification programmes to ensure that every household in underprivileged communities has access to reliable electricity.
- Introduce strict response-time standards for municipal electrical technicians to ensure rapid resolution of electricity outages and infrastructure failures.
- Improve waste management systems and strengthen municipal accountability to maintain cleaner and healthier communities.

4. Infrastructure Development and Urban Renewal

- Repair and maintain roads, potholes, drainage systems, and public pathways to improve safety and accessibility.
- Restore and modernise railway infrastructure to provide safe, affordable, and reliable public transportation.
- Reclaim hijacked, abandoned, and dilapidated buildings in order to restore community dignity, reduce criminal activity, and promote urban renewal.
- Invest in public infrastructure projects that create jobs while improving the long-term development of municipalities.
- Strengthen maintenance programmes for public facilities, parks, and community spaces.

5. Social Development and Crime Prevention

- Combat poverty through targeted skills development, entrepreneurship support, and community upliftment programmes.
- Strengthen drug rehabilitation and recovery initiatives to assist individuals struggling with substance abuse.
- Increase support for crime prevention programmes through stronger policing partnerships, youth development initiatives, and community engagement.
- Ensure harsher consequences for drug traffickers and organised criminal networks that contribute to the destruction of local communities.
- Promote programmes that support women, children, senior citizens, and vulnerable members of society.

Together, we can build safer communities, stronger local economies, and a more dignified future for all South Africans.
