

Lekwa Liberation Movement

Manifesto

!!!!!! BUSINESS AND JOB OPPORTUNITIES STRICTLY FOR LOCALS!!!!!!

1. Being surrounded by well-resourced social partners , like Seriti, Cofco, Eskom, Astral and more, we shall demand and enforce a conducive working system that hires and train our people for key roles within their businesses while grooming SMMEs who are 100% local.

For these demands we shall strive and live for as a governing factor with public released annual reports and statistics!!

In a town with poor and dilapidating infrastructure, our people will then be able to be well equipped to install boreholes and solar systems in their homes.

This will put an ease on load and prioritize electricity on factories for an uninterrupted operations with no fear for job loss.

LEKWA LIBERATION MOVEMENT

FOR THE PEOPLE , BY THE PEOPLE

2. Rebuild the municipality through revenue collection that will also enable for Eskom debt repayment and this through a town of working and business people.

This will then open a room for high focus on fixing our roads, dilapidated amusement parks and monuments, making our town a tourist and travelling attraction once again.

3. Enforce a high billing on rates and electricity to foreign owned spaza shops and businesses in the township and rural areas, which will boost the revenue whilst allowing a room for local people to thrive in business. This will also wedge illegal foreigners out of our town, curbing out illegal elements on many angles.

4. Short term lease agreements for farms, abandoned municipality buildings and parks to young people with strategies to utilize them.

This will create a competitive environment, for commercial ideas so to boost revenue for the municipality, whilst empowering people out of poverty.
